Superstore Sales & Profit Dashboard

Performance Analysis (2014–2017)

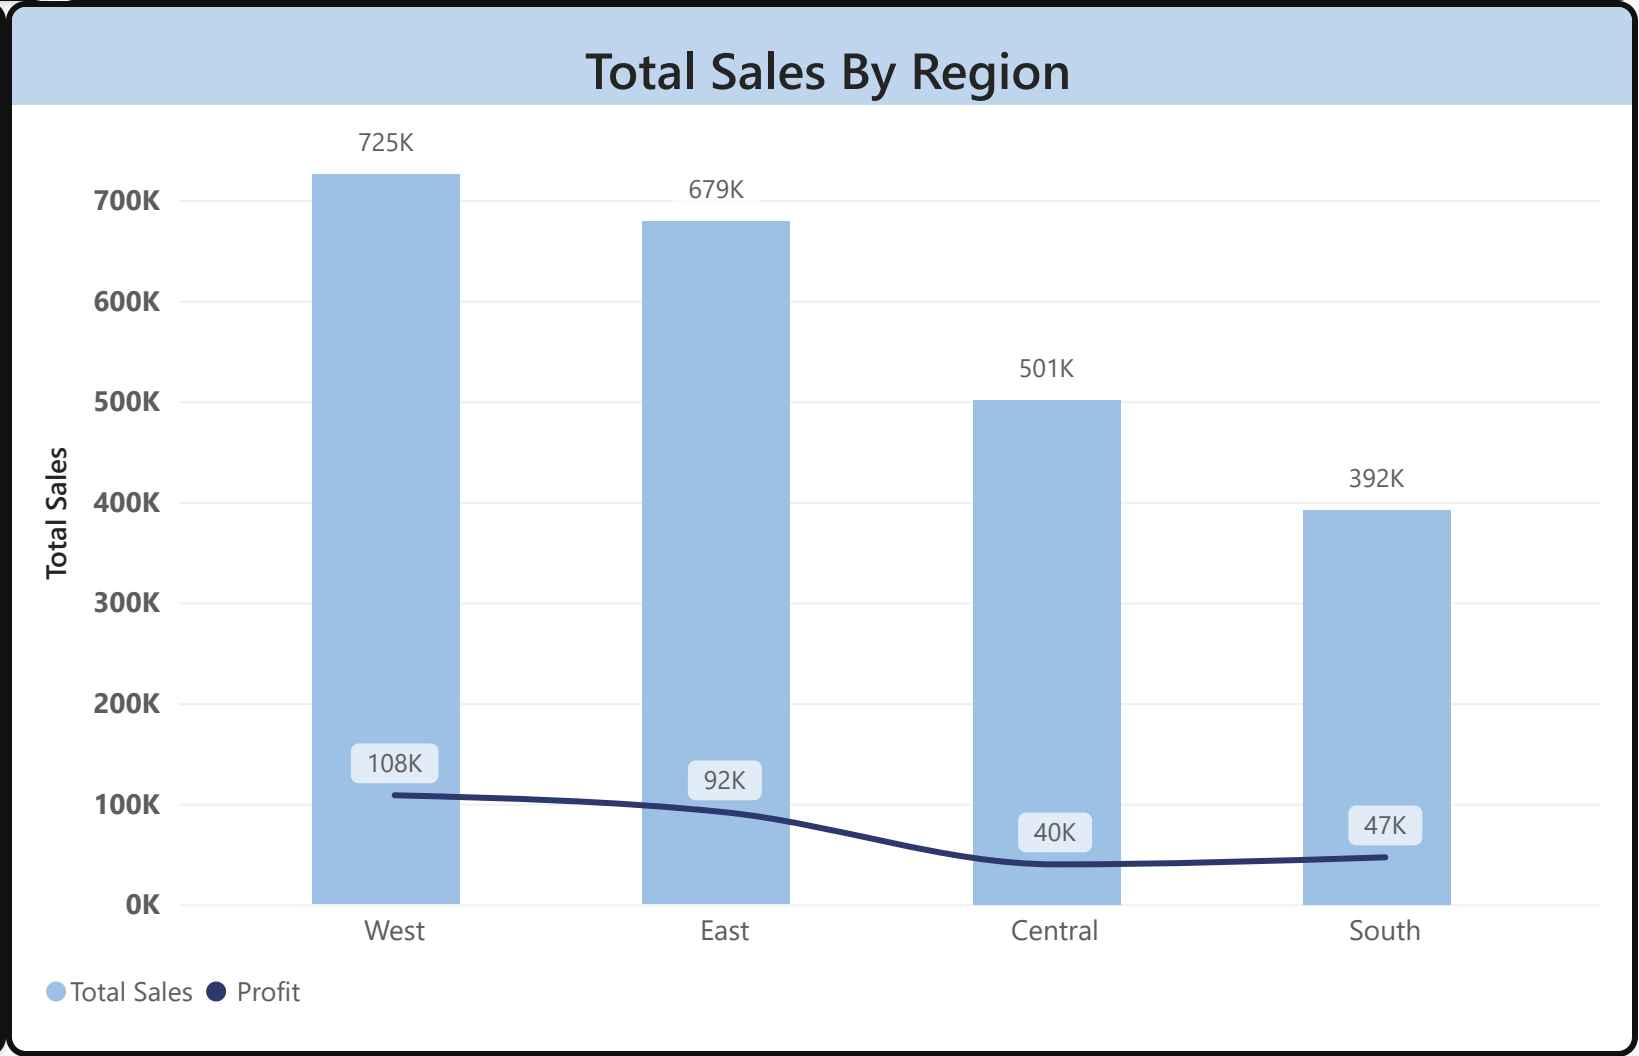

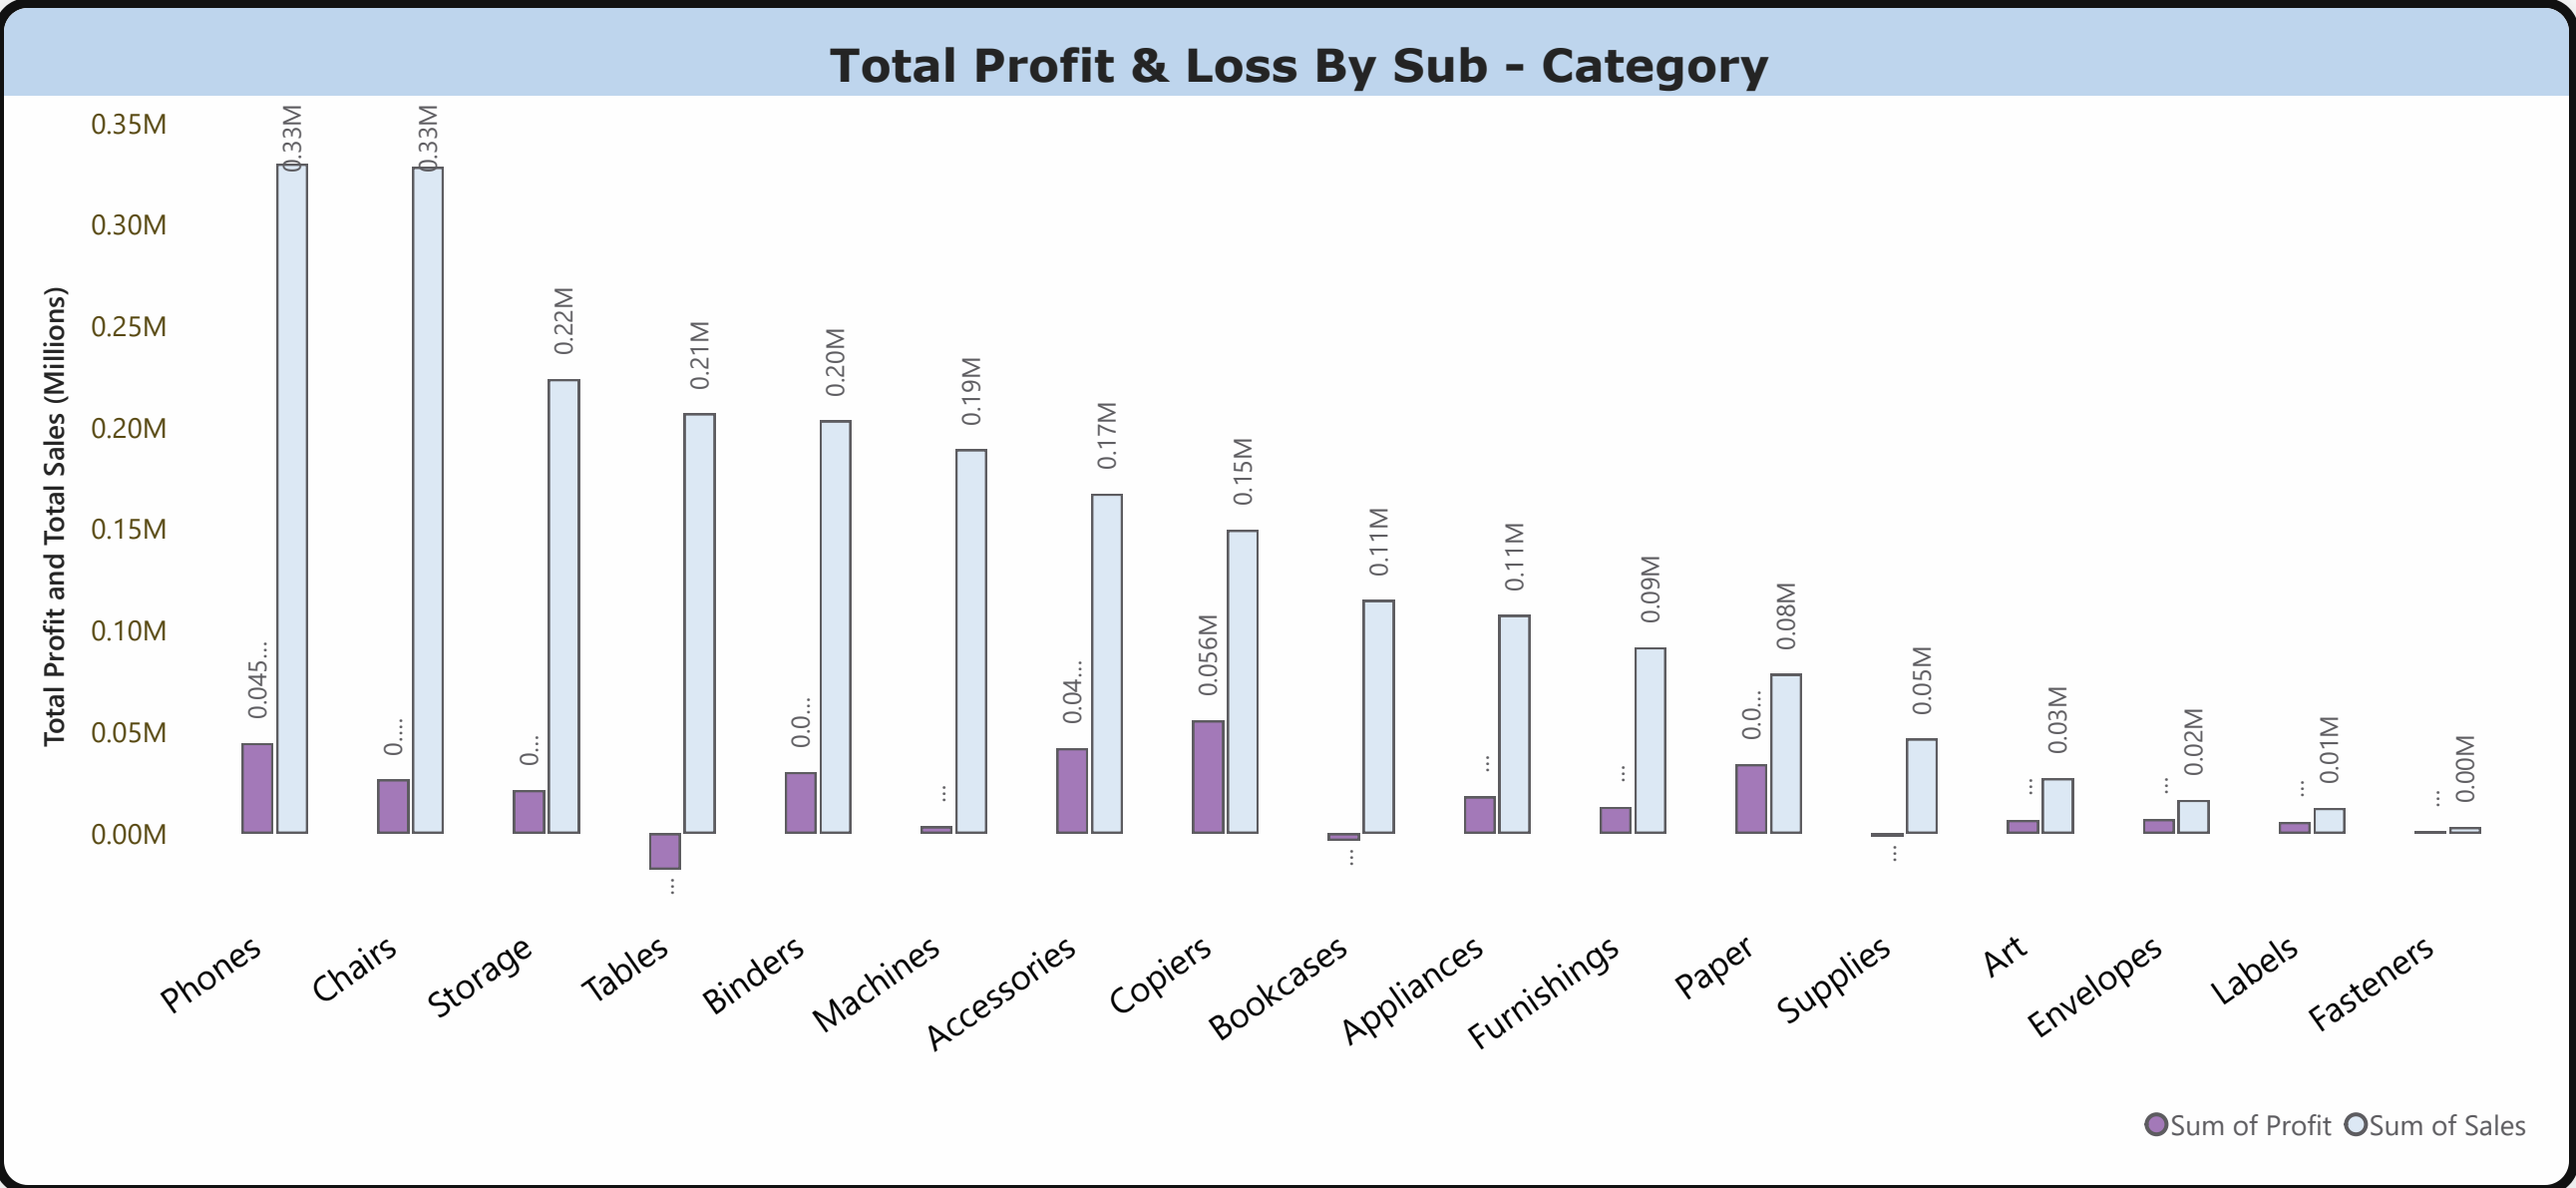

Insights

- Technology contributes the highest share of both sales and profit, but declining profit margins in recent periods indicate emerging pricing or cost pressures
- Furniture shows strong sales but low profitability, requiring pricing and discount optimization
- Sales performance is strongest in West and East regions, indicating potential for expansion strategies
- High sales do not consistently translate into high profit, highlighting inefficiencies in discounting strategy

Top 5 Product Type by Sales

Product Type	Sales	Profit/Loss
Binders	203413	30222
Chairs	328449	26590
Phones	330007	44516
Storage	223844	21279
Tables	206966	-17725

Sales vs Profit by Sub-Category (2014–2017)

Year, Region

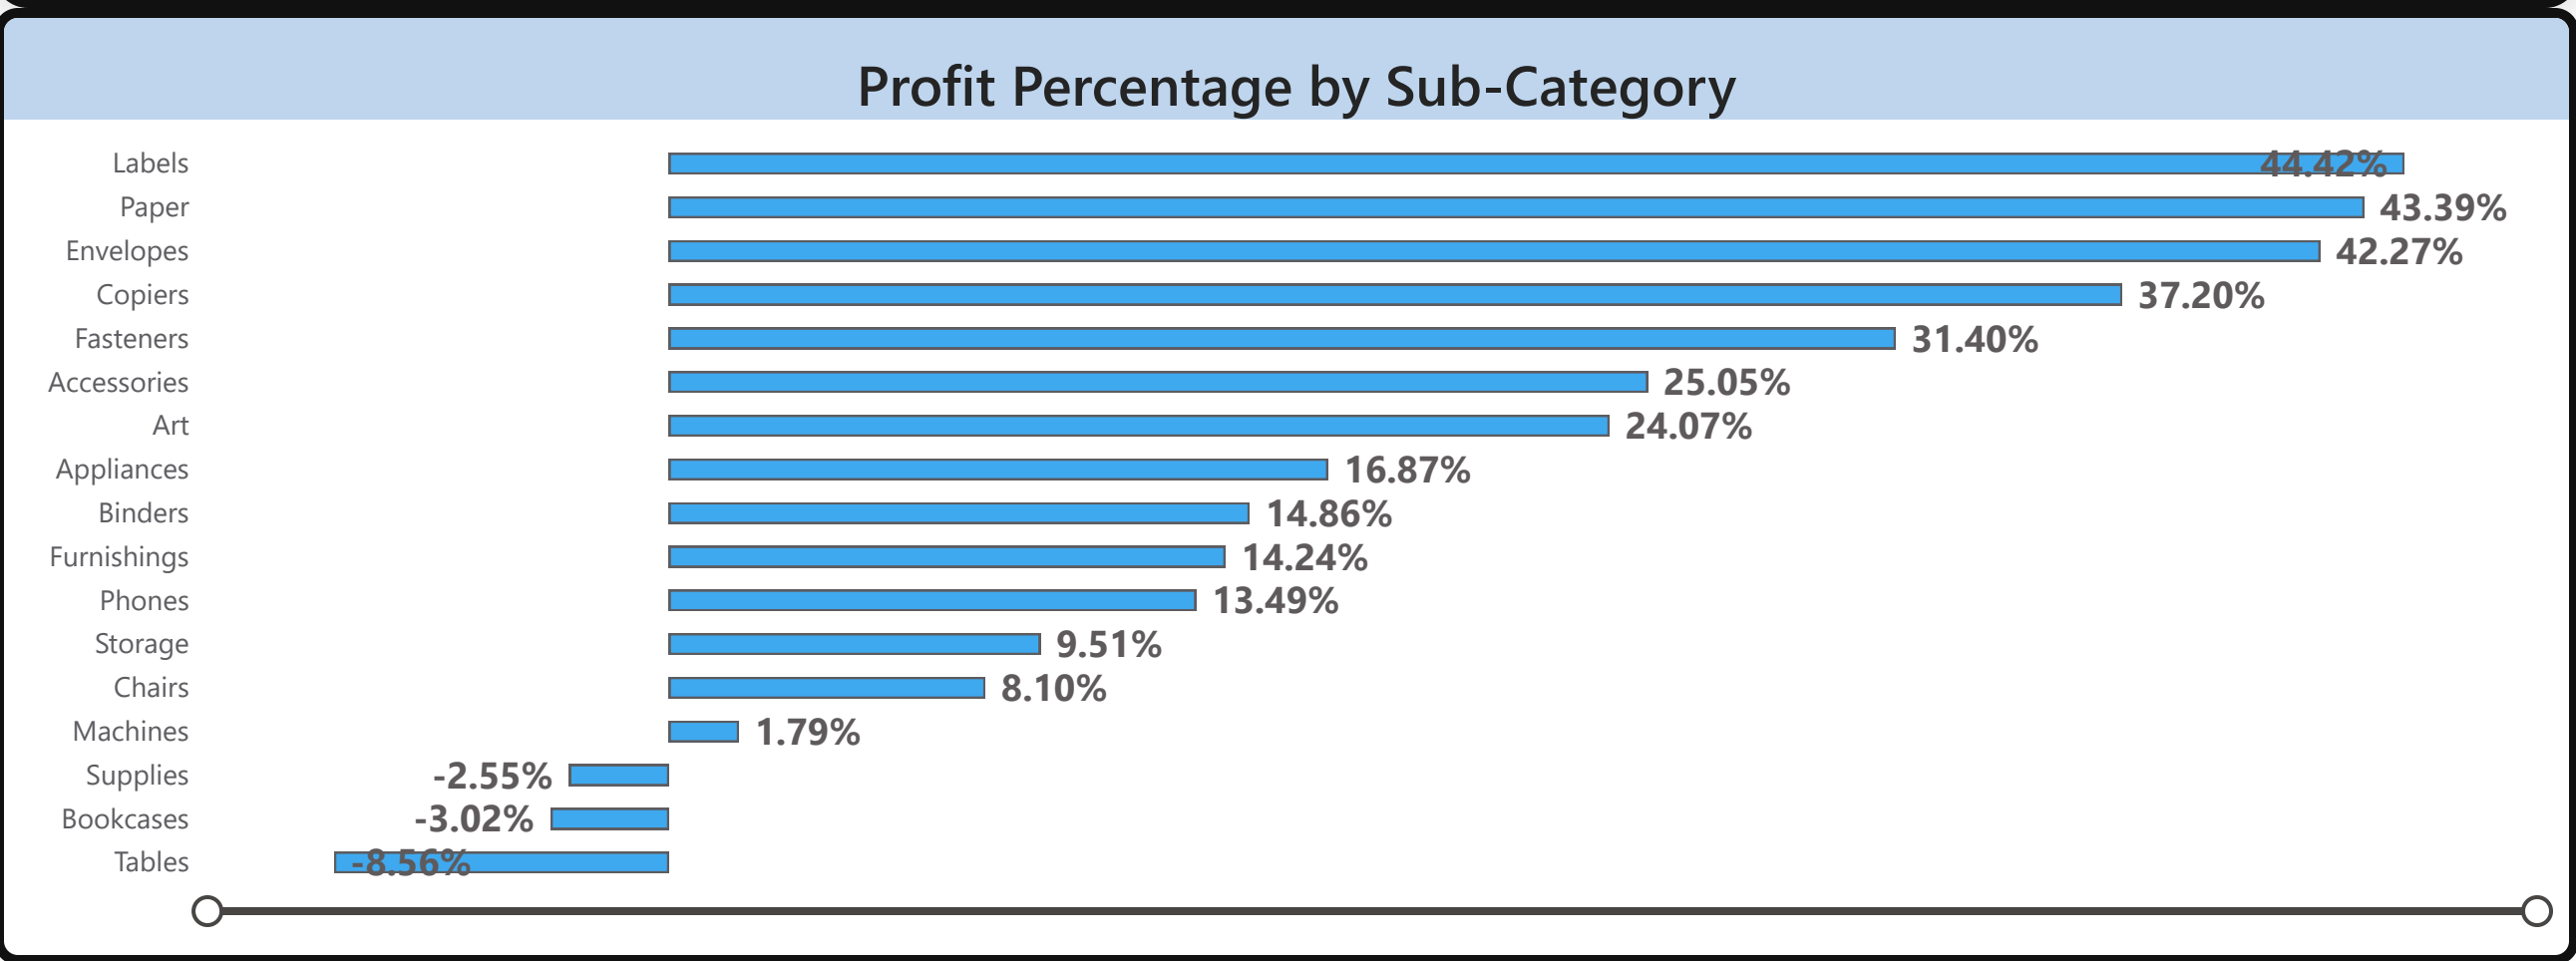

2014

2015

2016

2017

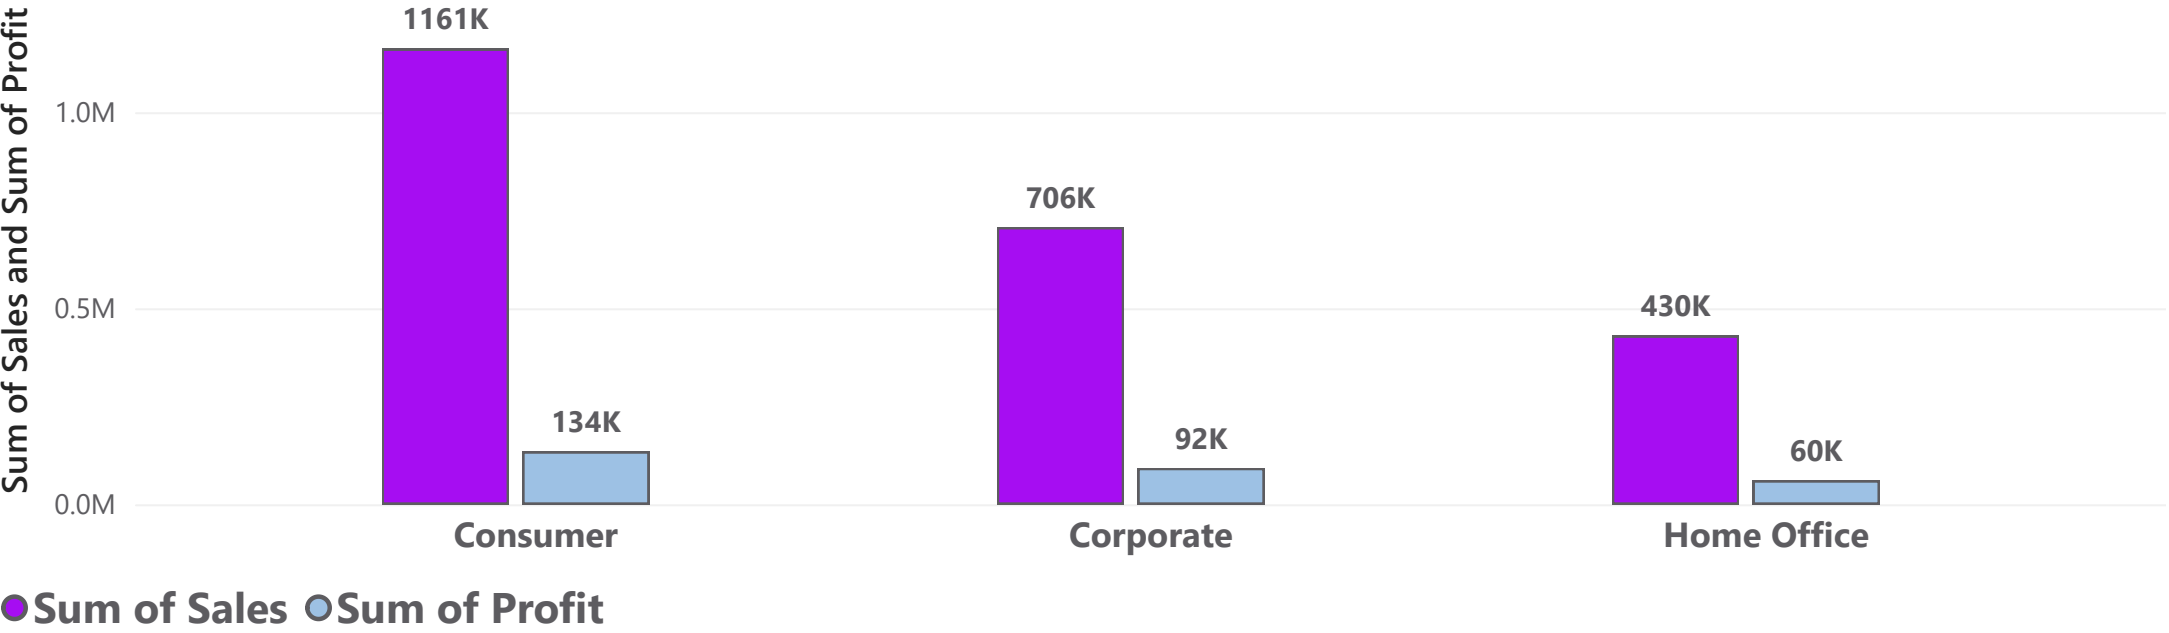

Loss-Making Sub-Categories	
Sub-Category	Loss
Supplies	-1189
Bookcases	-3473
Tables	-17725

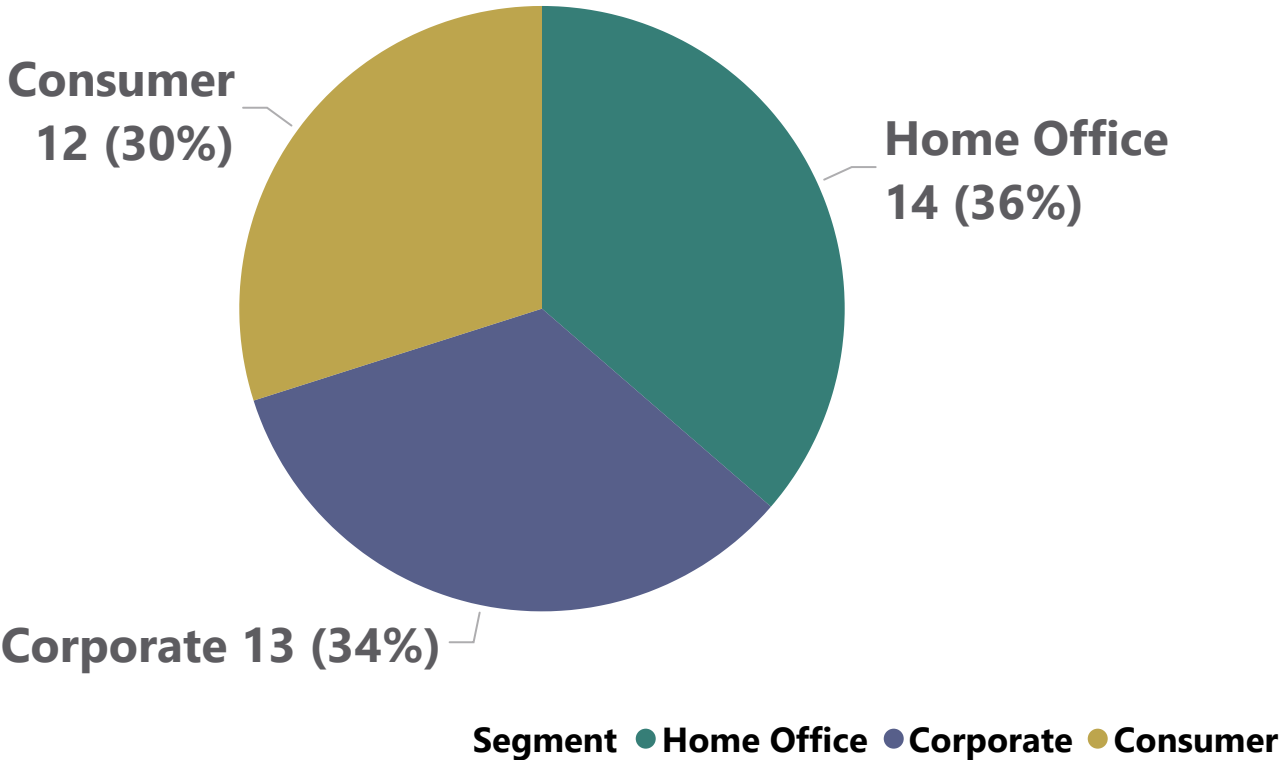

- ### Insights
- Phones and Chairs contribute the highest sales across sub-categories
 - Tables, Machines, and Supplies generate negative profit margins in selected regions
 - Central and East regions show a higher concentration of loss-making sub-categories despite lower sales performance
 - High sales do not consistently translate into high profitability across all product segments

Customer & Segment Analysis

Profit Margin Percentage by Segment

Average Discount, Profit Margin % and Total Sales by Sub-Category and Category

INSIGHTS

- Implement controlled discounting strategies for Tables and Bookcases, where higher discount levels are associated with negative profit margins.
- Tables and Bookcases generate high sales but weak or negative profitability due to aggressive discounting
- Higher discount levels are associated with lower profit margins across several sub-categories
- Technology products such as Phones and Copiers maintain healthier margins with controlled discounting
